SUMMARY

Full-stack developer with hands-on MERN and TypeScript experience, seeking a development internship. Built and deployed full-stack applications with secure authentication, REST APIs, and MongoDB database design.

EDUCATION

Gujarat University, Ahmedabad, India

Master of Science in IT (Integrated BSc + MSc) — 2025–2027 (Ongoing, Semester 9 of 10)

- Top 15% of batch
- Relevant coursework: Cloud Infrastructure (AWS, Azure), DevOps Automation (Ansible), Networking

Bachelor of Science in IT — 2022–2025

- Top 15% of batch

SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Context API, Custom Hooks

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Bcrypt

Database: MongoDB, Mongoose, Schema Design

CS Fundamentals: Data Structures & Algorithms (Basics, C++)

Tools & Platforms: Git, GitHub, Vercel, Render

Currently Learning: AWS, Azure, Ansible

PROJECTS

Finvra — Personal Finance & Wealth Management Platform *Live:* finvra.sohann.codes | *GitHub:* github.com/sohan-sindhav

- Built a unified platform to track bank entries and personal finances, replacing the need for 3–4 disconnected apps
- Implemented JWT-based authentication with Bcrypt password encryption to secure sensitive financial data
- Designed RESTful APIs and MongoDB schemas to handle structured financial records
- Currently in active development and private trial testing

Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Bcrypt

Authentication System (Learning Project) *GitHub:* github.com/sohan-sindhav

- Built a standalone authentication system to learn production-grade auth patterns
- Implemented JWT access tokens with refresh token rotation for persistent secure sessions
- Added role-based access control (RBAC) to manage permission levels
- Implemented rate limiting to protect against brute-force login attempts
- Currently in progress

Stack: TypeScript, Node.js, Express.js, MongoDB, JWT, Bcrypt

Personal Portfolio — Developer Showcase *Live:* sohann.codes | *GitHub:* github.com/sohan-sindhav

- Built a single-page portfolio to present projects and skills to recruiters without sending multiple links
- Integrated both live demo and GitHub repo links per project for quick recruiter access

Stack: React.js, Tailwind CSS, Node.js, Express.js
